## Work Experience

Freelance .NET Developer | Jan 2020 – Present

- Designed and developed web and desktop applications using C#, Blazor, and MSSQL Server, handling full project life cycle from requirements to deployment.
- Worked directly with clients to gather requirements, provide regular updates, and deliver customized solutions tailored to their business workflows.
- Built and maintained ERP modules, billing systems, and reporting tools, helping clients reduce manual work and improve day-to-day operations.
- Integrated systems with external services and hardware (e.g., USB/RS232 for weighbridge integration) to enhance automation and accuracy.
- Developed **REST APIs** for seamless communication between applications.
- Actively contributed to the developer community on Stack Overflow by answering questions and sharing knowledge.
- Provided long-term support and improvements for completed projects, ensuring clients stayed up to date and their systems ran smoothly.

## Key Projects

### Integrated Truck Management System for a Leading Cement Manufacturer | 6 Months

- Designed and deployed a web-based system that replaced legacy desktop applications.
- Integrated the application with the company's ERP for real-time data transfer and smoother coordination.
- Developed a custom service to capture weight data directly from hardware using RS232 and USB ports, enabling accurate communication with truck weighbridges.
- Improved operational flow by automating weight capture and reducing manual entry errors.

### Custom ERP Billing Software for a Leading Engineering Services Firm | 6 Months

- Built a scalable ERP web application with custom modules tailored to the client's business processes.

- Help reduce repetitive tasks and improve efficiency across departments such as billing and reporting.

## Comprehensive Billing System for Pharmaceutical Distributors | 1 Year

- Created a complete billing product that included key modules like sales, inventory, finance, and purchasing.
- Integrated detailed reporting features, including sales and purchase registers, profit and loss, and cash books.
- The system improved day-to-day tracking, inventory handling, and financial transparency, contributing to overall growth.

## Technical Skills and Expertise

- **Programming Languages:** C#, SQL, TypeScript, HTML, CSS, JavaScript.
- **Frameworks & Libraries:** .NET Framework, .NET Core, ASP.NET, ASP.NET Core, Blazor, Entity Framework, LINQ, Razor, WinForms, XAML.
- **Database Management:** Microsoft SQL Server, SQLite, .
- **Development Tools:** Visual Studio, Visual Studio Code, Postman, SSMS.
- **Version Control:** Git, GitHub.
- **Reporting Tools:** SAP Crystal Reports, Fast Reports, Bold Reports.
- **Operating Systems:** Windows (7, 8, 8.1, 10, 11, Server 2012r2, Server 2016, Server 2019), Linux (Ubuntu/Fedora – user-level operations, terminal commands, deployment).
- **Web & API Technologies:** REST APIs, JSON, HTTP, JWT Authentication.
- **Other Skills:** Full Software Development Lifecycle, System Integration, Problem-Solving, Analytical Thinking, Continuous Learning, Independent Development & Client Communication.

## Education

- **Bachelor of Technology (B.Tech), Electronics & Communication Engineering**  
Koneru Lakshmaiah College of Engineering  
Completed: 2021 | Grade: 74%
- **Class XII (Intermediate Education)**  
Telangana State Board – English Medium  
Completed: 2017 | Grade: 81%
- **Class X (Secondary Education)**  
Telangana State Board – English Medium  
Completed: 2015 | Grade: 79%

## Languages Known

- English
- Telugu
- Hindi

## Profile Summary

I'm a self-taught freelance Full Stack .NET developer with a strong focus on building practical and easy-to-use applications using C#, Blazor, and MSSQL Server. Over the last few years, I've worked closely with clients from different industries, helping them turn manual, outdated processes into smooth, reliable software solutions. Most of my work involves creating ERP systems, billing platforms, and reporting tools that simplify everyday tasks and improve accuracy for businesses.

I usually handle everything from planning and development to deployment and ongoing support. I prefer to keep things simple — writing clean code, making sure users can easily understand the system, and ensuring the solution solves their problem. I enjoy working independently, but I'm also good at communicating with clients to get feedback and make improvements.

Learning is something I truly enjoy. I regularly explore new technologies and improve my current skills so I can deliver better results. Whether it's connecting with hardware, designing a database, or building a custom feature, I put a lot of care into what I build and try to make each project better than the last.
